Figure 1. The effect of the concentration of the monomer on the polymerization of α -methylstyrene initiated by SnCl_4 in CH_2Cl_2 at -78°C . The polymerization was carried out in the presence of 0.01 mole-% of SnCl_4 and 0.01 mole-% of CH_2Cl_2 . The concentration of the monomer was varied from 0.1 to 0.5 mole-%. The polymerization was carried out in the presence of 0.01 mole-% of SnCl_4 and 0.01 mole-% of CH_2Cl_2 . The concentration of the monomer was varied from 0.1 to 0.5 mole-%.
